## ABSTRACT

In this brief paper, we show the calculations that confirm that Astrotheology is the correct and most advanced and ancient physics theory ever assembled.

**Keywords:** periodic table; astrotheology.

**Classification:** LCC: QB980-991

**Language:** English

## ABSTRACT

*In this brief paper, we show the calculations that confirm that Astrotheology is the correct and most advanced and ancient physics theory ever assembled.*

**Keywords:** periodic table; astrotheology.

## I. INTRODUCTION

In this paper, we consider the Periodic Table of the elements from Chemistry to prove that AT Math and Astrotheology Theory is the correct theory. It fits in well with the table.

Periodic Table =118 Elements

$$\begin{aligned} & 118(\text{Mp}^+ + \text{Me}^- + \text{Mn}^0) \\ & = 118(938 + 5.1099 + 938) \\ & = 34692 \end{aligned}$$

$$346.92/(8/3) = 13.0098 \approx E$$

$$\begin{aligned} E^2 + E - 2 &= t \\ 13^2 + 13 - 2 &= 180 = \pi = t \end{aligned}$$

$$\pi^2 - \pi - 1 = 57.29^\circ = 1 \text{ rad}$$

$$\begin{aligned} \#118 \times 938 &= 1.10684 \text{ p}^+ - 5.1099 \text{ e}^- \\ &= -4.00306 = M \end{aligned}$$

$$M = \ln t = \ln \pi = 1.2566 = E_{\min} \Rightarrow t = 1/2$$

$$\begin{aligned} \text{Teflon Pressure } p &= -1.75(1506) + 5761 \\ &= 3125 \end{aligned}$$

$$Mt = 4(18) = 72 = 8 \times 9 = tc^2$$

$$Mt = 4(8) = 32 = 0.3125 = 1/p$$

$$p = 1/[Mt] = 1/M(1/t) = E^2$$

$$\sqrt{72} = 8485 = 1/117.8 \approx 1/118$$

$$M H^+ = 1.0078 \times 6.023 = 607$$

$$t = e^M = e^{6.07} = 432.6 = 1/2.3117 = 1/\ln \pi = 1/M$$

Ionization Energy for Helium

$$M = 2 \times 6.023 = 12.046$$

$$t = e^M = e^{12.046} = 170.476$$

$$170.476^2 - 170.476 - 1 = 2.987 \approx c$$

$$c^2 = 8.33488$$

$$Mc^2 = 4.00(8.33488) = 33333 = 1/3 = 1/t = E \text{ when } y = y'$$

Now

$$M - s - t = F - E$$

$$4.00 - 4/3 - 1 = E - 2.666$$

$$E = 1$$

$$E = M - s - t + F$$

$$[=] \text{ kg} \cdot \text{m}^3 \cdot \text{s} \cdot [\text{kg} \cdot \text{m/s}^2] / \text{m}^2$$

$$= \text{kg} \cdot \text{m}^3 \cdot \text{s} \cdot \text{kg/m}^3 / \text{s}^2$$

$$= \text{kg}^2 / \text{s}$$

$$E = M^2 / \text{Moment} = 4.00^2 / (1585.3) = 1.0092 \approx M H^+$$

$$4 \times 4/3 \times 8/3 = \sqrt{2} = E$$

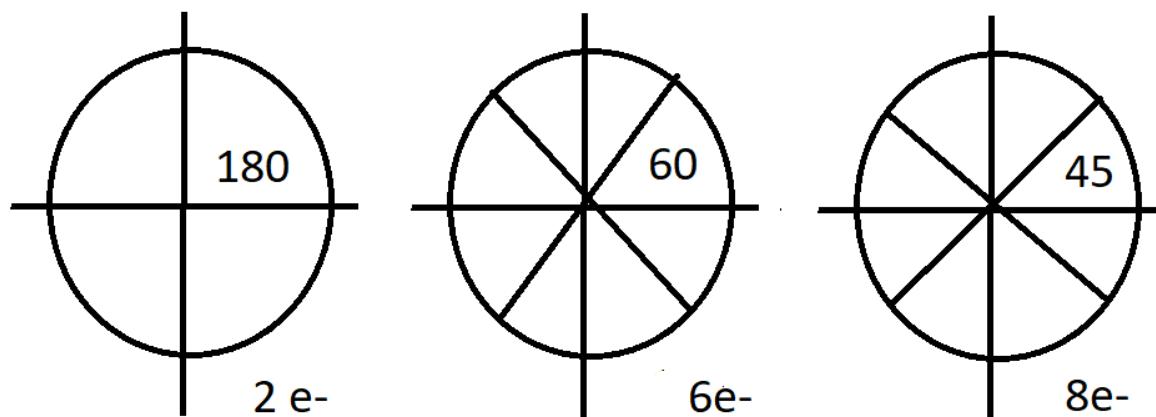

The Octet rule in chemistry of Bonds is 8 electrons in a shell because  $M = 1/81 = 0.012345679$

$$M = 0.012345679 + 0.7777777 + 2(H^+ \text{ & } He^{++}) = 9.012 = 3.002^2 = t^2 = c^2$$

## II. CONCLUSION

So we see that Astrotheology is the best theory for cosmology based on these calculations.

## VSEPR Critical Angle in AT Math

Average Temp of the universe=  $3K = t = KE = 1/2Mv^2$

$$t = KE = 3 = 1/2(M)(1/\sqrt{2})^2$$

$$M = 12$$

$$t = e^M = e^{12} = 1.627$$

$$GMP: E = 263$$

$$\text{Pressure} = -8/3/19905 = -1.339$$

$$-1.339 \times 101.325 = -1/(1-0.7367) = 1/1-263 = -E$$

$$1/(1-E) = -E$$

$$1/(1-E) = -E$$

$$E^2 - E - 1 = 0 \Rightarrow GMP$$

$$F/A \cdot 1/SA \cdot A/F = 1/SA = 1/s = E$$
